

Excellent acoustical performance

To get excellent acoustical performance and audibility in noise we designed a new earphone with improved efficiency and frequency optimization to match today's digital equipment. Big ear pads, large microphones which aid in noise cancelling and speech ability in high noise, it will give you the utmost performance for your critical communication.

Flexible and cost effective

With the standardized CH-3 headset, call lines and the attachment of ELX2 cables brings a world of applications. For a jacket with different applications you can use the same headset yet change the cable to address the various tasks required. This means that the worker can keep the same headset as they change the work which reduces a low cost and high maintenance expense. For the worker the headset can become personal, which may result in lower cleaning costs if operators are no longer required to share headsets. CH-3 is designed to be DIY-repairable. Most parts are changeable without tools, simple plug and play.

Designed and engineered for use in tough conditions

Specifically designed to operate reliably in harsh conditions, the CH-3 headset is built to withstand temperatures and wet or dusty conditions.

3M™ PELTOR™ CH-3 Headset

When it matters the most...

The new CH-3 headset will bring hearing protection and communication in any environment to a new level of performance. Critical communication has never been easier.

3M Science. Applied to life.™

New design for enhanced comfort during long hours of use

Newly designed dual model cups give a modern and slim look together with the new bright yellow color for enhanced visibility. Cup size is reduced with retained high attenuation and comfortable space for ears. The reduced size also contributes to less weight which can enhance comfort during long hours of use.

We have designed an all new headband with improved flexibility to better fit different types of head shapes. Headband cable is easily detachable from headband in need of replacement.

- DIY-repairable**
Most parts are changeable without tools, simple plug and play.
- New headband with comfort**
An all new headband with improved flexibility and different head shapes. Detachable cable for easy repair.
- SK built design**
Ergonomic and fit design and modern look.
- Bright yellow color**
For enhanced visibility.
- Efficient speakers**
Noise attenuating headset helps improve speech clarity in noisy environments. All in portability and ergonomics as accessories.
- Hearing Protection**
Noise attenuating headset helps improve speech clarity in noisy environments. All in portability and ergonomics as accessories.
- ELX2 accessory connector**
For use with ELX2 boom mic connector for high flexibility.
- Noise cancelling IP68 boom mic**
For use with ELX2 boom mic connector for high flexibility.
