SKID STEER AND COMPACT TRACK LOADER

155/175/210/215/250/270/300/330/150T/210T/215T/250T/270T/300T/320T/325T

Operating weight: 2,955 – 5,089 kg Gross rated power: 42 – 55 kW (56 – 74 hp)

THE RANGE.

INTRODUCING THE LATEST RANGE OF JCB SKID STEER AND COMPACT TRACK LOADERS.

With 16 small or large platform models to choose from featuring both vertical lift and radial lift options on wheeled and tracked chassis' and with engines from 42kW (56hp) to 55kW (74hp), there's sure to be a model to suit your needs.

With their unique Powerboom™ design and side entry door, JCB skid steers and compact track loaders are both stronger and safer than conventional twin arm machines but still give you all the power and performance you need.

STRENGTH AND DURABILITY.

JCB HAS EARNED ITS REPUTATION FOR STRENGTH AND DURABILITY, AND JCB SKID STEER AND COMPACT TRACK LOADERS ARE BUILT TOUGH TO HANDLE THE DEMANDS OF ANY APPLICATION AND ANY CONDITION.

Structural strength.

- 1 Fully-welded chassis provides a rigid structure for maximum strength and reduced weight. For consistent performance on demanding terrain, JCB skid steer and compact track loaders feature a solid undercarriage with cast steel, triple-flanged rollers.
- 2 JCB rams utilise the keyhole casting design for structural strength and durability.
- 3 A large chassis cross-member provides maximum strength to further support the Powerboom™, with either a standard mechanical quick hitch or the optional powered variant.
- 4 Wheeled models feature durable, forged steel axles and a strengthened drive chain for trouble free operation in all conditions.
- 5 The fuel tank is mounted inside the loader tower for maximum protection, and is equipped with an easily accessible drain port. The optional fuel cap protection plate prevents debris from gathering around the neck of the cap.

Built to last.

- 6** The iconic JCB Powerboom™ boasts tapered pivot pins and 20 percent more steel than conventional twin-arm skid steer designs. The result is greater rigidity for less wear, longer life and improved retention of material in the bucket.
- 7** The JCB Powerboom™ provides safe internal routing for hydraulic hoses, for maximum protection from impact and other damage.
- 8** The quick hitch comprises high-tensile steel and high-strength welds for longer life, and features a fully-closed tilt cylinder to eliminate debris infiltration on large platform models.
- 9** For extra support and greater breakout force, JCB skid steers have the largest quick hitch pivot pins in the industry, and increased pivot pin diameter on the boom.
- 10** JCB's stringent test programs include prolonged high-stress loading of the chassis, boom and other key components, as well as cold climate testing and repeated transmission use over thousands of cycles.

POWER AND PERFORMANCE.

WITH PLENTY OF POWER AND VERSATILE FEATURES, JCB SETS NEW STANDARDS FOR EFFICIENCY AND PRODUCTIVITY IN SKID STEER AND COMPACT TRACK LOADERS.

Versed in versatility.

1 Unlike conventional skid steer cooling systems, the JCB engine cooling system pulls cool, clean air from above and forces hot air out through the sides and rear, away from the operator. The result is improved, efficient cooling, even in extreme conditions.

2 An industry standard quick hitch provides quick and efficient coupling not only for all JCB attachments, but for any brand of skid steer attachments on the market.

3 The standard hydraulic circuit on JCB small-platform skid steer and compact track loaders has a flow rate of 70 lpm. For large platform machines, the standard hydraulic circuit flow rate is 90 lpm. A high-flow option, up to 125 lpm (depending on machine size), is available for maximum attachment versatility.

4 Optional counterweight packages are available on some models, for increased rated operating capacity (ROC), to meet individual requirements.

Maximum output.

5 The 300 and 300T models feature variable displacement piston pump hydraulics for faster cycle times and smoother multi-functioning.

7 Optional parallel lift makes it easier to position loads with forks or attachments on all JCB models. Parallel lift helps to keep loads level throughout the lift cycle; ideal for carrying palletised loads.

6 JCB's optional Smoothride System (SRS) allows the boom and load to move independently from the chassis, for improved load retention, operator comfort and, ultimately, faster loading cycles and journey times.

8 The JCB minimal footprint of the JCB skid steer and compact track loader range, combined with 360-degree pivot capability, allows for easy manoeuvring within confined job sites.

Vertical lift capability provides maximum lift capacity at maximum height and reach, making it the right choice for load and carry operations, including fork work, heavy construction and landscaping.

Radial lift capability provides improved digging geometry. This is the preferred choice for operating attachments, but also used for jobs such as backfilling, excavating, grading applications, asphalt work, and street construction.

THE WORLD'S SAFEST.

WITH A WIDE-OPENING SIDE DOOR FOR SAFE ENTRY AND EXIT, WITH A JCB MACHINE OPERATORS NO LONGER NEED TO CLIMB OVER LARGE ATTACHMENTS OR UNDER AN UNSUPPORTED BOOM.

All around visibility.

1 Thanks to JCB's Powerboom™ loader arm, operators of JCB skid steer and compact track loaders enjoy 60 percent better visibility around the machine than users of conventional twin-arm machines.

2 The low boom profile on hi-viz models allows excellent visibility to both sides of the machine, the quick hitch, as well as enhanced visibility to the tracks or wheels.

3 Flat glass is easy and cost effective to replace if necessary. A mesh option is also available to suit specific applications.

The side-mounted windshield wiper on all models with a fully enclosed cab improves front visibility to the quick hitch and attachment for increased productivity.

4 With no requirement for the rear torque tube found on conventional machines, operators of JCB vertical lift models benefit from even greater rear visibility. Additionally a standard-fit rear view mirror enhances rearward visibility.

Traditional Twin Arm Skid Steer and Track Loaders

165° All-round Visibility

JCB Skid Steer and Track Loaders

270° All-round Visibility

Safer by design.

7 A wide-opening door and large grab handles enable easy and safe entry and exit, eliminating crush and slip hazards associated with front-entry skid steers and compact track loaders.

8 Emergency exit from JCB skid steer and compact track loaders is via the front of the machine, as opposed to the small rear window on conventional twin-arm designs.

A reverse alarm is standard, and a white noise reverse alarm is available as an option.

9 An optional beacon and front screen guard are available for increased safety and security. Other options include a fire extinguisher and a variety of tyre choices.

An optional keyless immobiliser allows the operator to enter a four-digit PIN to start the machine, instead of a keyed ignition.

10 The optional electric quick hitch is fitted with a single-point lock-and-unlock flag for optimal visibility, to ensure that the attachment is safely locked/unlocked.

11 Tasks such as loading a truck or changing attachments are simplified due to excellent visibility to the cutting edge of the bucket and quick hitch.

7

Wide-opening cab door and large grab handles for easy entry and exit.

9

10

11

TOTAL COMFORT AND CONTROL.

WITH EASY SIDE-DOOR ENTRY, THE LARGEST CABS ON THE MARKET, ELECTRIC CONTROLS AND ADJUSTABLE JOYSTICK CONTROLS, JCB SKID STEERS AND COMPACT TRACK LOADERS OFFER UNRIVALLED COMFORT FOR MAXIMUM PRODUCTIVITY.

Industry-leading operator environment.

1 The latest JCB cab is in a class of its own for ergonomics and operator comfort. The operator environment on large-platform JCB machines is 33 percent larger than the competition; on small platform machines, JCB cabs are 46 percent bigger.

2 JCB cabs feature a handy storage space and 12-volt power socket for charging mobile phones and other devices.

3 JCB skid steers and compact track loaders have one of the best ventilation systems in the industry, thanks to three cab ventilation filters and an external panel cover. Air conditioning is available as an option, to provide the perfect, controllable cabin environment.

Deflection plates in the engine bay direct heat out of the rear door and away from the operator.

4 All JCB skid steer and compact track loader cabs are fitted with a sliding window on the left side for improved ventilation and communication with co-workers.

Total control.

5 JCB's myCHOICE control software allows the responsiveness of the joysticks to be adjusted. Three settings allow operators to tailor the sensitivity of joystick movement to match the way they work. The new software enables one-touch unlock operation for ease of use.

6 Instrumentation at operator eye-level on the left side of the cab includes the integrated standard radio and climate control functions. This position limits exposure to dirt and dust to avoid damage.

7 On the right side of the cab, an easily accessible control panel features machine diagnostics, electric hand throttle and ignition switch.

8 ISO or H-pattern controls are available to suit operator preferences. ISO (single joystick operation) comes as the standard control pattern but the ISO-H Pattern option can be added.

9 The diagnostics, electronic throttle and ignition switch are within easy reach, minimising fatigue. An optional 7-way multi-function joystick (included with high-flow hydraulics option) makes it easy to control a wider range of attachments.

The radio features an AUX port that is compatible with mobile phones and other devices.

Operators can control power, torque and tractive effort; allowing for maximum productivity.

A SOUND INVESTMENT.

JCB SKID STEERS AND COMPACT TRACK LOADERS ARE EFFICIENT TO USE, OWN AND OPERATE. SUPERIOR BUILD QUALITY, GREAT FUEL EFFICIENCY AND LOW RUNNING COSTS ENSURE HIGH RESALE VALUES AND MAXIMUM RETURN ON INVESTMENT.

JCB EcoMAX.

1 Our T4 Final EcoMAX engine uses up to 9% less fuel than our Tier 3 units, saving you money.

EcoMAX produces its peak torque at low revs for fuel-efficient matching of the transmission and hydraulics.

Because this engine doesn't require costly exhaust after-treatment or heat-resistant lube oils, it saves money on servicing.

EcoMAX can be remapped to operate on low quality fuels. This means these loaders can be resold across different territories, improving residuals.

JCB Diesel by Kohler.

2 Small platform JCB skid steers and compact track loaders are equipped with the JCB Diesel by Kohler KDI Tier-4 Final engine, featuring a maintenance-free diesel oxidation catalyst (DOC) and offering improved torque and fuel efficiency.

JCB Diesel by Kohler engines boast an advanced combustion system that significantly reduces emissions and fuel consumption.

Like the JCB EcoMAX unit, JCB Diesel by Kohler engines require no exhaust after-treatment, such as DEF or a DPF, for reduced operating costs and maintenance down time.

More for your money.

3 The hydraulic, variable speed cooling fan automatically responds to the engine speed; as RPMs increase or decrease, so too does fan speed, increasing productivity.

4 An optional, reversible fan purges debris from the rear screen, reducing maintenance downtime and increasing productivity in dirty, dusty conditions. Reverse airflow can be set to auto-mode, or engaged manually by the operator from inside the cab as required.

5 JCB large platform skid steer and compact track loaders are equipped with an air intake scavenge system as standard, minimising debris build-up in the air filter to extend service intervals.

A belly plate underneath the machine protects it from impact damage.

6 An optional 2-speed transmission enables JCB skid steers and compact track loaders to achieve faster travel and cycle times.

SIMPLE SERVICING.

JCB SKID STEER AND COMPACT TRACK LOADERS ARE LOW-MAINTENANCE AND EASY TO SERVICE, MAKING THEM AFFORDABLE, EFFICIENT AND HIGHLY PRODUCTIVE.

Unrivalled serviceability.

1 All daily checks and greasing can be performed at ground level. Daily maintenance points, pre-filters, oil and air filters are easy to access via a large, rear service door. The door is recessed for protection from potential impact damage.

If access to major components is required, the cab can be tilted in less than five minutes.

2 JCB's tilting cabs can be operated by one person and opened in just a few minutes, to provide access for more detailed maintenance. On large-platform models, this can be done without raising the boom.

3 O-ring face seal hydraulic fittings reduce leaks and maintenance downtime.

To facilitate a quick clean out with a power washer, the engine bay is extremely accessible. Additionally, the machines also feature flat floors with no foot wells for speedy turnaround times.

VALUE ADDED.

JCB'S WORLDWIDE CUSTOMER SUPPORT IS FIRST CLASS. WHATEVER YOU NEED AND WHEREVER YOU ARE, WE'LL BE AVAILABLE QUICKLY AND EFFICIENTLY TO HELP MAKE SURE YOUR MACHINERY IS PERFORMING TO ITS FULL POTENTIAL.

1

1 Our Technical Support Service provides instant access to factory expertise, day or night, while our Finance and Insurance teams are always on hand to provide fast, flexible, competitive quotes.

2 The global network of JCB Parts Centres is another model of efficiency; with 16 regional bases, we can deliver around 95% of all parts anywhere in the world within 24 hours. Our genuine JCB parts are designed to work in perfect harmony with your machine for optimum performance and productivity.

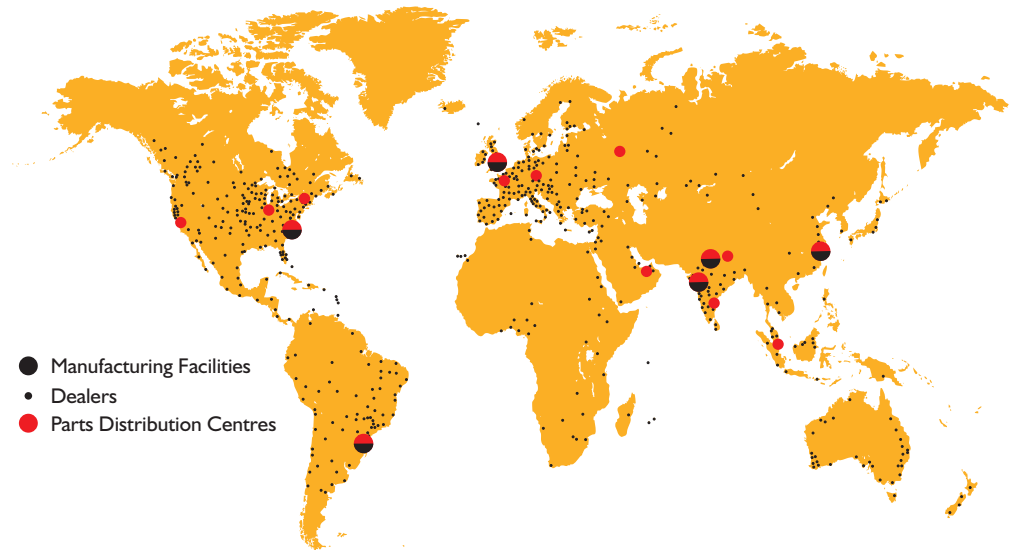

2

3 JCB Assetcare offers comprehensive extended warranties and service agreements, as well as service-only or repair and maintenance contracts. Irrespective of what you opt for, our maintenance teams around the world charge competitive labour rates, and offer non-obligation quotations as well as fast, efficient insurance repair work.

3

Note: JCB LIVELINK and JCB ASSETCARE may not be available in your region, so please check with your local dealer.

- Low joystick lever efforts give excellent and easy control of transmission, loader and attachments.
- Auxiliary hydraulics are actuated on the joystick roller giving progressive control of hydraulic fluid flow for precise attachment control
- Loader arm hydraulic lines under protective steel guard on PowerBoom™.
- Canister style, full flow, hydraulic oil filter.
- JCB engine oil for engine and chain case.
- JCB hydraulic oil.
