

## » BEF 203 – BEF 201

Adjustable handle

Milling up to the edge

### BEF 203 – With integrated edger

Scarifier for concrete and screed with integrated edger. Absolutely essential for effective and quick working results on small surfaces. An adjustable handle bar, the infinitely variable depth control and lifting makes it especially user friendly.

#### Applications

Roughening and grooving of concrete, removing of coatings, road markings, cement residues and old floor coverings.

#### Features

- Working up to 10 mm to the edge
- Power supply cord, standard 12 m
- Adjustable and ergonomic handle
- Large transport wheels
- Integrated suction outlet Ø50mm
- Dust sealed drum bearing
- Variable depth control
- Lifting grip

## BEF 203

BEF 201 petrol version

Easy to use, safe in application

### BEF 201 – High performance surface planer

Concrete and screed milling machine for small to medium sized areas. The low centre of gravity affords a big silent running and ensures quick and even milling results. Double-sided rotor bearing and hardened cutter bearings make these particularly reliable.

#### Applications

Roughening and grooving of concrete, removing of coatings, road markings, cement residues and old floor coverings.

#### Features

- Milling housing made of cast iron, particularly heavy design
- Rotor bearing
- Dust-tight and maintenance-free rotor bearings
- Continuous milling depth adjustment
- Motor overload protection (e-version)
- High-level air intake (petrol version)
- Automatic motor shutdown when oil level is low (petrol version)
